

Apple Developer WWDC Interactive Events Attendance Policy

Please read the following terms and conditions of the Apple Developer WWDC Interactive Events Attendance Policy carefully. In order to accept the Attendance Policy, you (A) need to be the age of majority in your jurisdiction (at least eighteen years of age in many countries) or have your parent or guardian's consent to agree to these terms and (B) have the power to enter into a binding contract with Apple. If you do not or cannot accept to be bound by the terms and conditions of this Attendance Policy, you will be ineligible to sign up, request, or attend Labs (as defined below) or other WWDC interactive events.

General

To participate in any WWDC interactive events, including Labs, you understand and agree that your Apple Developer Program ("ADP") account or Apple Developer Enterprise Program ("ADEP") account must be current, valid, and in good standing through the end of the WWDC week. ADP or ADEP membership is not required if (1) you were a Swift Student Challenge winner in 2023 or 2024, (2) you are a 2025 Swift Student Challenge applicant and are currently at least 18 years of age, or (3) you have prior written approval from Apple.

You must agree to the terms and conditions of this WWDC Interactive Events Attendance Policy ("Attendance Policy") before signing up for a Lab, submitting a Lab appointment request, or attending a Lab. If you do not agree, you may not attend a Lab or other WWDC interactive events. All Labs are conducted in English, unless otherwise indicated. You are responsible for the internet access and all equipment necessary to attend a Lab.

Labs

To request an appointment or sign up for one or more WWDC developer one-on-one labs or group labs ("Lab(s)"), you need to sign in with the Apple Account associated with the applicable Apple Developer Program membership. Additionally, if you are requesting an appointment for a one-on-one lab, you will need to choose a topic and time, and submit your question in advance. Apple will review your request and/or send you an email with your status for attending a Lab. Labs are conducted by one or more Apple personnel, and language support may be provided, as available, and in Apple's sole discretion.

Your Lab session may not be sold, shared, auctioned, exchanged or otherwise transferred, unless otherwise permitted by Apple. You will not be able to sign up or request a Lab if you have not attained the age of majority in your jurisdiction. In order to log into the Lab, you will be required to use Webex, and may need to provide your name and email address.

Code of Conduct

Apple is committed to creating a safe and welcoming event experience. At all times, attendees are expected to treat others with respect. Apple reserves the right to terminate a one-on-one lab at any time in its sole discretion, including but not limited to participants behaving in an inappropriate manner, posting messages unrelated to WWDC or software development, or for failing to comply with this Attendance Policy. If you have an experience that violates this code of conduct, contact wwdc@apple.com. You agree not to record, copy, reproduce or take photos or screen shots of the Labs, without the prior written consent of Apple.

No Confidential Information

Apple works with many software developers and some of their products may be similar to or compete with the materials you submit. Apple may also be developing its own similar or competing apps, playgrounds, products or services or may decide to do so in the future. Any information, suggestions or recommendations that you provide to Apple in a Lab or submit in

connection with a Lab will not be confidential, and Apple has no confidentiality obligations with respect to such disclosures.

Disclaimers; No Rights Granted

Apple makes no warranties or representations about any information or advice provided at the Labs and you agree not to rely on any such information or advice. All Labs are provided by Apple on an “AS IS” and “AS AVAILABLE” basis. You acknowledge and agree that no intellectual property rights are granted or to be implied by Apple to you as a result of your participation in a Lab. Apple retains all its right, title, and interest in and to any Apple intellectual property and no rights or licenses are granted or to be implied hereunder under any Apple intellectual property. We reserve the right to change the Attendance Policy and any other information contained on our sites at any time. Your continued use of our sites or Lab attendance after such changes constitutes your acceptance of and agreement to these changes.

Apple Independent Development

Nothing in this Attendance Policy will impair Apple's right to develop, acquire, license, market, promote or distribute products, software or technologies that perform the same or similar functions as, or otherwise compete with, any other products, software, or technologies that you may develop, produce, market, or distribute. In the absence of a separate written agreement to the contrary, Apple will be free to use any information you provide to Apple at the Lab for any purpose, subject to any applicable proprietary rights.

Cancellation and Removal

Circumstances may arise requiring that Apple cancel your Lab, and Apple does not guarantee that you will be informed in advance of such cancellation. Additionally, Apple reserves the right to cancel or remove multiple event sign-ups that appear to be automated, duplicative, or otherwise indicative of spam. Apple does not ensure the quality of bandwidth or connection to any interactive events. If you do not cancel your Lab in advance or if you otherwise fail to attend a scheduled Lab, you may not be able to schedule another appointment. Apple reserves the right to remove any attendee from a Lab or other interactive event, at any time in its sole discretion (e.g., for improper behavior, inappropriate questions, or failure to comply with this Attendance Policy). Failure to comply with this Attendance Policy may result in suspension or termination of your Apple Developer Program account, ability to attend future Labs and/or other WWDC interactive events.
